

# Project Report

## Team Members :-

1. Gourav Singla [20103094]
2. Deepanshu Garg [20103058]
3. Balkaran Singh [20103104]
4. Pranav Thakur [20103113]

## Description :-

Time Table Management System is designed in a way that every student will get update about classes/Labs. Teachers can also schedule extra lectures as per schedule without having clashes with other lectures and can notify students about free lectures.

Basically It converts the complex timetable managing process in a simplified process that is convenient for both teachers and Students.

## Perks of our Website :-

1. Time Table according to free Lecture Halls and Availability of Teachers.
2. Announcement Portal where teachers can announce extra lectures and cancellation Announcements.
3. Display of Time Table of each teacher.
4. Students can see their attendance record and location of class/lab.

## Website Layout :-

1. Login checkboxes given for both students and Teachers are given.
2. Checkbox to fill main Credentials required to make timetable separately for both students and teachers.
3. SQL Database for storing all data and it will be further used to make efficient time table.
4. Teacher-Class Chat box.
5. View of Timetable according to each subject and teacher to check free lectures.
6. Status of attendance of Students.
